 Campus Safety Department

Safety Tips

The Campus Safety Department's main mission is the safety of people and property. The following information is provided to help you become familiar with the services provided by Campus Safety and some safety tips that all of us can use to keep ourselves safe on campus.

Safety Services

Request an **escort service** by calling Campus Safety if you feel uneasy or threatened. This service is available 24/7. Campus Safety will meet you at your location and escort you to class or to any event on campus. If you have a dead battery or have locked your keys in your car, call Campus Safety for assistance.

Put the **Campus Safety phone number** on the speed dial of your cell phone. During an emergency, all you have to do is push one button to reach Campus Safety. The officers will hear your request over their radio in real time. It is important to give your location at the start of your communication so officers can start responding to your location while you provide further information.

Know the locations of the **emergency phones** on campus. Look to identify the closest phones near your parking area and all classroom locations. If there is an emergency, you do not have to search for an emergency phone because you have already identified their location. There is a routine business line and a red emergency line. If you push the red button and talk, every officer and the Campus Safety desk can hear you speak.

Consider buying a **personal safety device** like pepper spray or a personal alarm. A personal alarm makes a loud sound and attracts people's attention to your location. Pepper spray and a personal alarm are sold in several different retail locations. If you do decide to purchase one, train yourself in its use before an emergency occurs.

When walking through the campus, **stay on pedestrian paths** and do not take shortcuts through isolated areas. If possible, walk in groups to your location either going to class or returning to your vehicle.

Awareness of your surroundings is important. Look around to see who is nearby and who looks suspicious. When you return to your vehicle, be aware of suspicious people standing by your vehicle. If you spot someone, do not approach your vehicle. Call Campus Safety and officers will investigate. Be aware of your surroundings when using ATM's (Automated Teller Machines). Keep track of who is behind you.

Park in well-lit areas, especially for students attending night classes. Travel in heavy pedestrian routes on campus. Stay away from remote areas of campus.

Keep valuables out of sight. Many crimes are "crimes of opportunity." Keep valuables (phone, tablets laptops) out of sight and out of reach by putting them away when you're not using them. When carrying them with you, keep them stowed out of sight in your bag or pocket. Never leave your laptop unattended, even at the library. Keep personal belongings in view while in a classroom or lab. Consider registering phones with a third-party tracking service to aid in recovery in the event of loss/theft. Do not keep valuables in your car. If you must, keep them in the trunk where they are out of sight. If you have an internal trunk lock, use it.

If you see something, say something. If you notice something suspicious or if a situation just doesn't seem right, call Campus Safety at 714-992-7080, Ext 0 and report it. A map of emergency phones on campus will help you locate emergency phones near your parking area and your classrooms.
